

## CÓMO PUEDEN AYUDAR A SALVAR AL PLANETA MICROSOFT, GOOGLE, AMAZON, APPLE, SPACEX, ORACLE, NVIDIA, SONY, PHILIPS, TOYOTA, HONDA, MITSUBISHI

1.- Disponemos hasta diciembre 2023 para activar el Proyecto SCOPEX y reducir la temperatura promedio 1,5º C. En caso de no hacerlo se comenzarán a disparar retroalimentaciones positivas entre todos los ecosistemas acoplados con foco inicial en Antártida a partir de enero 2024.

2.- Mediante Gaia Team se convocará a la participación de más de 14.000 científicos de todo el planeta para trabajar en conjunto sobre las hipótesis elaboradas por el CEO de GSL Systems y en conjunto con NASA será posible la activación de un mapa dinámico holográfico de IA, cargado con todas las variables climáticas interactuantes, las conocidas y deduciendo las todavía desconocidas, mediante una intranet interconectando todas las computadoras cuánticas disponibles. De este modo se dispondrá de un sistema eficaz de predicción de los próximos puntos de inflexión de la anomalía climática, sus impactos, inercias, intensidades, fechas y retroacciones. (Los 14.000 científicos integran la Alliance of World Scientists, dirigida por el Dr. William J. Ripple, que figura en el prólogo del e-book "MASTEREARTH PARA SALVAR AL MUNDO ¿Fusil de clatratos activo en 2025/30?: Para evitar la catástrofe no queda tiempo, ya debemos invertir el 2% anual del PIB mundial. Aplicarían medidas extremas", editado por Editorial Académica Española").

3.- Se invita a los Dres. James Hanson y William Ripple, como a los profesores [Johan Rockström](#) y Lowell Sott a liderar y coordinar los trabajos de investigación científica.

4.- Mayday.Live ha lanzado el Master Plan de Emergencia Climática Planetaria desde el sector privado. Para esto ha gestionado la financiación del Proyecto SCOPEX. Se requiere que los gobiernos o dos superpotencias, como Estados Unidos y China, se presenten como garantes del préstamo. Asimismo ha invitado a Dinners para activar la tarjeta Forest Card, la cual destinará el 50% de su beneficio neto para proceder a la plantación inmediata de 30 mil millones de nuevos árboles para capturar CO2 en sus troncos, luego talarlos y enterrarlos, devolviendo este gas de efecto invernadero al subsuelo. Se plantarán un trillón de árboles. Mediante nuestra alianza estratégica con Quantum Investment Bank, ya contamos con un sistema de IA para determinar la factibilidad de proyectos sustentables. Esto nos permitirá acelerar la activación de proyectos de escala de alta mitigación de la anomalía climática y por intermedio de greeninterbanks.com se canalizarán las inversiones con los grupos de bancos y fondos de inversión aliados a esta iniciativa global.

5.-El CEO de GSL Systems lidera la campaña del Fondo Verde Solidario del 2% del PIB anual, para terminar con el hambre, pobreza extrema y calentamiento global. Esto debe ser inmediatamente aprobado por los gobiernos en todo el mundo. Debe entenderse que sin capitales intensivos no será posible implementar soluciones globales de alta escala. Como ejemplo, Estados Unidos, durante la II Guerra Mundial, comprometió el 36% de su PIB completo. No esperemos dar solución a los problemas actuales con esfuerzos inferiores. Debido a la inacción climática hasta criminal de los

200 presidentes del planeta, que se niegan a aprobar estos fondos, RG ha propuesto que las multinacionales donen hasta el 50% de sus beneficios netos durante los próximos 5 años o hasta que los gobiernos aprueben el 2% del PIB.

6.- Entendiendo que las multinacionales toman decisiones mediante juntas de accionistas y esto demora tiempo, RG propone una medida de emergencia no convencional: Integrar los recursos de Microsoft, Google, Amazon, Apple, SpaceX, Oracle, Sony, Philips, Nvidia, Mitsubishi y Toyota. Cómo hacerlo: GSL Systems requiere aportes de logística, infraestructura y estructura en forma rápida, porque todos estamos contra reloj y es necesario actuar de inmediato. GSL Systems dona el 50% de su beneficio neto a Mayday.live y esta corporación no profit en formación los invierte en ayuda humanitaria y en proyectos ecológicos en todo el planeta que sean urgentes y prioritarios. Han sido invitados el señor Leonardo DiCaprio como CEO de temas ecológicos, la señora Angelina Jolie como CEO en ayuda humanitaria y el señor Brad Pitt como CEO financiero. A cambio de los aportes de recursos de las multinacionales mencionadas GSL Systems abrirá la participación accionaria del 40% de sus activos, por U\$S 100 millones, a favor de las participantes, mediante cuotas partes.

7.- SpaceArch.Solutions LLC con sede en Miami se encuentra activa, contando con los apoyos necesarios se procederá a la activación de GSL Systems Corp, Greeninterbanks Corp y Maday Corp no profit. Los sistemas de captación de capital serán luego transferidos al Eco Gobierno Global para ayudar en su financiación y administración, sin afectar la percepción de beneficios por parte de los accionistas. No es el lucro el motor de esta iniciativa mundial, salvar al planeta lo es...

Estamos todos juntos en el mismo barco, o cooperamos y trabajamos de buena voluntad en forma coordinada, sincronizada y solidaria, o nos hundimos todos....

## HOW MICROSOFT, GOOGLE, AMAZON, APPLE, SPACEX, ORACLE, NVIDIA, SONY, PHILIPS, TOYOTA, HONDA, MITSUBISHI CAN HELP SAVE THE PLANET

1.- We have until December 2023 to activate the SCOPEX Project and reduce the average temperature by 1.5° C. If this is not done, positive feedback will begin to be triggered among all the coupled ecosystems with an initial focus on Antarctica from January 2024.

2.- Through the Gaia Team, the participation of more than 14,000 scientists from all over the planet will be called to work together on the hypotheses developed by the CEO of GSL Systems and in conjunction with NASA it will be possible to activate a dynamic AI holographic map, loaded with all the interacting climatic variables, the known ones and deducing the still unknown ones, through an intranet interconnecting all the available quantum computers. In this way, an effective system will be available for predicting the next inflection points of the climatic anomaly, its impacts, inertia, intensities, dates and retroactions. (The 14,000 scientists make up the Alliance of World Scientists, led by Dr. William J. Ripple, which appears in the foreword of the e-book "MASTEREARTH TO SAVE THE WORLD. Clathrate gun active in 2025/30?: To prevent the catastrophe there is no time left, we must already invest 2% per year of world GDP. They would apply extreme measures", edited by Editorial Académica Española").

3.- Drs. James Hanson and William Ripple, as well as professors Johan Rockström and Lowell Sott to lead and coordinate scientific research work.

4.- Mayday.Live has launched the Planetary Climate Emergency Master Plan from the private sector. For this, it has managed the financing of the SCOPEX Project. Governments or two superpowers, such as the United States and China, are required to come forward as guarantors for the loan. It has also invited Dinners to activate the Forest Card, which will allocate 50% of its net profit to proceed with the immediate planting of 30 billion new trees to capture CO2 in their trunks, then cut them down and bury them, returning this gas greenhouse effect to the subsoil. A trillion trees will be planted. Through our strategic alliance with Quantum Investment Bank, we already have an AI system to determine the feasibility of sustainable projects. This will allow us to accelerate the activation of large-scale projects to mitigate climate anomalies and, through greeninterbanks.com, investments will be channeled with groups of banks and investment funds allied to this global initiative.

5.-The CEO of GSL Systems leads the Green Solidarity Fund campaign of 2% of annual GDP, to end hunger, extreme poverty and global warming. This must be immediately approved by governments around the world. It should be understood that without intensive capital it will not be possible to implement global solutions of a high scale. As an example, the United States, during World War II, committed 36% of its entire GDP. We do not expect to solve the current problems with inferior efforts. Due to the even criminal climate inaction of the 200 presidents of the planet, who refuse to approve these funds, RG has proposed that multinationals donate up to 50% of their net profits for the next 5 years or until the governments approve the 2% of GDP.

6.- Understanding that multinationals make decisions through shareholder meetings and this takes time, RG proposes an unconventional emergency measure:

Integrate the resources of Microsoft, Google, Amazon, Apple, SpaceX, Oracle, Sony, Philips, Nvidia, Mitsubishi and Toyota. How to do it: GSL Systems requires logistical, infrastructure and structure contributions quickly, because we are all against the clock and immediate action is needed. GSL Systems donates 50% of its net profit to Mayday.live and this non-profit corporation in formation invests it in humanitarian aid and ecological projects around the planet that are urgent and priority. Mr. Leonardo DiCaprio as CEO of ecological issues, Mrs. Angelina Jolie as CEO of humanitarian aid and Mr. Brad Pitt as financial CEO have been invited. In exchange for the contributions of resources from the aforementioned multinationals, GSL Systems will open the shareholding of 40% of its assets, for U\$S 100 million, in favor of the participants, through shares.

7.- SpaceArch.Solutions LLC based in Miami is active, with the necessary support, GSL Systems Corp, Greeninterbanks Corp and Maday Corp no profit will be activated. The capital raising systems will then be transferred to Eco Gobierno Global to help finance and manage them, without affecting the perception of benefits by shareholders. Profit is not the engine of this global initiative, save to the planet is...

We are all in the same boat together, or we cooperate and work willingly in a coordinated, synchronized and supportive manner, or we all sink...

**Who is the architect Gomes?** He has higher yogi training, super advanced. He reached Nirvana on 02-02-04. Under normal conditions his IQ averages 120/140, in samadhi it is 220 and when he is at the level of buddhic consciousness his range is unlimited, his brain being capable of processing information at hyperluminal quantum speed, which gives him the ability to perceive instant transfinite. However, this greater data obtained by his superconscious requires constant academic training in order to be later processed at a conscious level. He is the creator of Neuroyoga, a system that facilitates access to superconscious states of mind. He studies techniques to increase IQ. He has developed the Samsaric Rational Nirvana system accessible to all minds with scientific training and has written about the use of superconscious states in the scientific method to refine, amplify and accelerate it.

**Architect Roberto Guillermo Gomes**, CEO founder of Green Interbanks, creator of the initiative. Leader of **2% For The Planet**. Responsible for the sustainable projects area and financial

- Green.interbanks@gmail.com

Gomes is currently studying 4 master's degrees and other courses online, so by the end of 2023 it will add 50 university and tertiary degrees. At the end of 2024, he is scheduled to start his first doctorate in Neuroscience, and then he will do another 3. In the remainder of his life, he plans, God willing, to add 100 degrees to complete his academic and scientific training.

Gomes predijo en el 2009 la actual aceleración del calentamiento global, al igual que el descongelamiento del Polo Norte en 2030, el recalentamiento del Atlántico Norte, incremento de la intensidad de huracanes y de la actividad sísmica y volcánica. También predijo el tsunami en Japón.
